ABSTRACT

The New York State Education Department is legislatively mandated to present an annual report on education in the state, summarizing enrollment, academic achievement, student outcomes, and information about teachers and staff. As one part of the annual report, this document presents individual school district profiles largely for the 1988-89 school year. Five tables present data on the following parameters for each district: (1) racial/ethnic distribution of enrollment, attendance rate, dropouts and youth at risk, high school graduates, and administration salaries; (2) classroom teachers (pupil-teacher ratio, percent minority, annual turnover rate, median salary, certification status, median years experience, educational attainment, and expenditures) per pupil and by major function; (3) results of the pupil evaluation program, program evaluation tests, and preliminary competency tests; (4) results of New York State Regents Examinations in comprehensive English, comprehensive French, comprehensive Spanish, and sequential mathematics I, II, and III; and (5) results of New York State Regents Examinations in biology, earth science, physics, United States history and government, and global studies. To the Governor and the Legislature of the State of New York:

Chapter 655 of the Laws of 1987 (which amended Section 215-a of State Education Law) requires the Board of Regents and the State Education Department to submit an annual report to the Governor and the Legislature with respect to "enrollment trends; indicators of student achievement in reading, writing, mathematics, science and vocational courses; graduation, college attendance and employment rates; .... (and) information concerning teacher and administrator preparation, turnover, inservice education and performance." The law further states that: "To the extent practicable, all such information shall be displayed on both a statewide and individual district basis and by racial/ethnic group and gender."

The annual report is presented in two parts. The first is an analysis of statewide data contained in the publication, New York, the State of Learning: Statewide Profile of the Educational System. The second part is the individual district profiles contained in this document. Data in both publications were derived, primarily, from information submitted by Superintendents of Schools to the Department's Information Center on Education and Division of Educational Testing. The data highlighted in the publications were selected in accordance with the specific mandates of Section 215-a of Education Law. There are, of course, other data regarding student performance, instructional programs, support services, and resources which must be considered in order to develop fully comprehensive profiles of school districts.

The information contained in this report should be helpful to the Governor, the Legislature and the citizens of New York State in assessing the effectiveness of the many educational programs supported by the State, and in working with the Board of Regents and school officials to improve learning outcomes for our children and youth.
